Dave Traut

ABOUT US

Cousins, Mark and Dave Traut grew up working for the family company known as Traut Wells, which was started in 1959. The company was dissolved for a time in 1982 but reopened later that year as Mark J. Traut Wells, Inc. (currently known as Traut Companies) by Mark and Dave. It was obvious from the start that Mark and Dave offered their customers not just top-of-the-line service but an integrity that customers recognized and appreciated.

Right away, they sought to diversify, offering new, better, and valuable services to their customers. They looked for and expanded into related markets. Today, they employ more than 50 full-time people, in eight different departmental areas, each area having its own expert. The companies' steady growth and expertise has brought them to the attention of customers nationwide, who rely on their services.

Traut has never stopped experimenting with new technology. It's what keeps them at the top of their industry. They're big supporters of their industry, and donate to technological research that is sure to lead to important and exciting advances.

SAFETY

In the decades that have come and gone, Traut Companies has continued to lead the charge for workplace safety. Traut Companies has and continues to take a safety-first approach on all aspects of their daily work. Along with other responsibilities, safety consciousness always exists in our thinking and planning. Our dedication to safety and ongoing training allows our employees the confidence and ability to recognize unsafe acts, and the ability to anticipate potential hazards.

Traut Companies has never forgotten where we came from, or why we're here. Our goal, every single day, is to provide our employees with the safest work environment to help ensure a safe return home at the end of each work day.
